FlowFAST V
Vertical Laminar Airflow Cabinets

PROTECTION, SAFETY, RELIABILITY. AND MORE.
FlowFAST V Cabinets are “ISO Class 3” vertical laminar flow cabinets which represent far more economical and valid alternatives to clean-rooms, as they are capable of providing uncontaminated, particle-free and sterile conditions for materials in the work-space. They guarantee and maintain excellent product protection factors by offering a positive pressure particle-free working area by virtue of the prefilter with a minimum efficiency of 80%-90% ASHRAE - and the H14 HEPA/ULPA filter (air cleanless in Class ISO 3, according to ISO 14644-1) with an efficiency better than 99,995 % MPPS (EN-1822).

The FlowFast V vertical laminar airflow cabinets have epoxy powder coated steel structures and an AISI 304L stainless steel working surface as standard. Alternatively special models in negative pressure and fully made in AISI 304L stainless steel for superior cleanability are also available on demand.
UV STERILIZING LAMP
Magnetic UV Sterilizing Lamp available as added option supplied with frontal aluminium night door panel with side hook for hanging.

OPERATIONAL PRINCIPLES
The environment air is drawn from the top of the cabinet via a pre-filter and then pulled downwards and filtered by virtue of H14 HEPA/ULPA filter into the working area in vertical laminar air flow pattern. About half of the volume is exhausted outside into the environment and remaining volume is re-circulated by means of slots positioned at the bottom of the back panel.

SUPERIOR FEATURES
Structure of the FlowFAST V model vertical LAF cabinets is in epoxy powder coated cold-rolled steel for excellent corrosion resistance to the attack by aggressive common chemicals. Alternatively special models made in AISI 304L stainless steel for superior cleanability are also available on demand.
**FlowFAST V**

**Vertical Laminar Flow Cabinets**

**ANTI BACTERIAL COATING**

Each FASTER cabinet is coated with exclusive **Dupont™ ALESTA®** anti-bacterial “Ag+ cations-based solution”, capable to prevent microbial contamination of surfaces thereby inhibiting long term surface growth.

**SIDE WALL**

Transparent side walls in safety glass. Servicing holes are positioned on the right and left side glasses for taps installation (available as an option).

**STANDARD FITTINGS**

One service connection for electrical power available as standard for model FlowFAST V 12 and two electrical sockets for the models FlowFAST V 15 and FlowFAST V 18.

**MAINTENANCE**

Useful snap hinges keep in open position the frontal tempered glass increasing the height of the frontal opening. This solution allows the entrance of devices (such as microscopes) beneath laminar flow.

THE USER-FRIENDLY PRACTICAL KEYBOARD

Membrane keyboard front panel with touch-sensitive buttons for:
- main On/Off switch
- night mode and UV lamp
- light
- power socket

It is fitted with digital display for indicating air velocity and the relevant alarms in case the cabinet is equipped with anemometer and automatic airflow control.

FlowFast V unit is supplied as standard without digital display and automatic air flow speed regulation.

APPLICATIONS

FlowFAST V LAF Cabinets have been widely adopted in many sectors of industry and in science laboratories for use when handling no-risk cell cultures or non-pathogenic biological specimens when the aim is to provide a high degree of protection factor to the samples and the products on the worktop.

These cabinets are recommended for use in applications such a Quality Control in the pharmaceutical and food - beverage industries, Cell culture, Sterile manipulation.

OPTIONS AND ACCESSORIES

- UV lamp with aluminium night door closure for FlowFAST V 12/15/18
- Aluminium night door closure for FlowFAST V 12/15/18
- Epoxy painted base stand for FlowFAST V 12/15/18
- Epoxy painted base stand with castors for FlowFAST V 12/15/18
- Additional service connection for electric power
- Gas tap for FlowFAST V 12/15/18
- Vacuum tap for FlowFAST V 12/15/18
- Compressed air tap for FlowFAST V 12/15/18
- Nitrogen tap for FlowFAST V 12/15/18
- Automatic regulator with digital anemometer, factory fitted (automatic UV cycle)
- Digital Display for FlowFAST V 12/15/18 (manual UV cycle including UV Timer and Hour Counter)
- Differential pressure gauge (Magnehelic), factory fitted.
